Dear Colleague,

### **Laptops for Teachers**

I am pleased to announce that a further £471,982 has been allocated from the ICT in schools (Grant 31a) fund for the procurement of laptops for 2004/2005. In order to successfully achieve the 66% target rate for each school as required by the DfES (by 2006), the projected number of laptops that can be purchased with this funding is 486 based on a cost of £970 per laptop.

However, unlike previous years schools can choose how to procure the Laptop allocated under the initiative. The LEA can manage the procurement of Laptops as it has done for the previous two years, where a consultation exercise will take place with technical and school representatives in order to identify accredited suppliers **or alternatively** schools can opt to purchase from the Becta approved suppliers list with their allocation.

If you require Learning Services IT to procure the Laptops allocated on behalf of your school would you please indicate on the attached proforma your intentions by the 14<sup>th</sup> April 2004. If the proforma is not received by this date then it will be assumed that the school will require the funding allocation and will procure the Laptop's themselves.

Further information regarding the laptops for teachers initiative is available at the following links;
